## **DETAILED ACTION**

### ***Claim Objections***

Claims 13 – 23 are objected to because of the following informalities: Claim 13 recites on line 21 that “a second signal” should have been “ a second bias signal”.

Appropriate correction is required.

Claims 14 – 23 are objected because these claims depend on a objected claim.

The abstract of the disclosure is objected to because on line 11, the word “signa” should have been “signal”. Correction is required. See MPEP § 608.01(b).

### ***Allowable Subject Matter***

Claims 1 – 46 are allowable over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter: the prior art failed to teach a phase lock loop or a delay lock loop having a smoothing means for smoothing the leading phase signal or delayed phase signal and outputting a control signal and a superposing means for superposing the leading phase signal or delayed phase signal on the control signal.

This application is in condition for allowance except for the following formal matters:

This application is allowable except those objections explained in above paragraphs.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
